Company profile: Media NV was established in 2014. Our headquarters is in North America, an MNC, and we have offices in Ahmadabad and Chandigarh. When you work with Media NV, you work with family. We are focused on building the best product leveraging the latest technologies in the market. Our team is comprised of individuals who are passionate, driven, and the best at what they do. We combine creativity, technology, and passion to fully integrate your business with the online world and give you ample opportunity to grow your brand. We are looking to add a senior software project manager to the team.

Job requirement Designation:
Quality Assurance
Education Qualification: Any Graduate
Company Website: www.medianv.com

Job Summary:

We are looking for a meticulous and detail-oriented **Quality Assurance Engineer** to join our dynamic team. The ideal candidate will be responsible for ensuring the quality of our products and services through the development and execution of tests, identification of bugs, and documentation of testing results. You will work closely with the development team to ensure that all products meet the required quality standards before they are released to end-users.

Key Responsibilities:

- Develop, execute, and maintain manual and automated test scripts based on product requirements and specifications.
- Identify, document, and track defects or bugs using appropriate defect-tracking tools (e.g., Jira, Bugzilla, etc.).
- Collaborate with development teams to understand product functionality, design appropriate test cases, and ensure seamless integration.
- Perform various types of testing (Functional, Regression, Load/Performance, Usability, etc.).
- Validate and verify that software functions meet business needs and user expectations.
- Conduct root cause analysis for production issues and work closely with developers to resolve them.
- Continuously improve testing processes, tools, and methodologies to enhance test coverage and reduce defect leakage.
- Ensure that all software releases are thoroughly tested before production.
- Prepare and present detailed reports and documentation on the test results.
- Participate in project meetings to provide insights on quality risks and recommend solutions to minimize them.
- Assist in the creation of QA policies, standards, and best practices for the organization.

Qualifications and Skills:

- Bachelor's degree in Computer Science, Information Technology, or related field.
- Proven experience in software testing, quality assurance, or a related role (typically 2-5 years).
- Strong knowledge of QA methodologies, tools, and processes.
- Hands-on experience with automated testing tools (e.g., Selenium, QTP, TestNG).
- Familiarity with Agile development processes and working in a Scrum team.
- Proficient in testing web-based applications, mobile applications, and APIs.
- Experience with version control systems (e.g., Git).
- Strong analytical, problem-solving, and critical thinking skills.
- Excellent verbal and written communication skills.
- Attention to detail and commitment to delivering high-quality results.
- Ability to work independently and within a team environment.
- Familiarity with CI/CD tools (e.g., Jenkins, Bamboo) is a plus.

Why join us?

- Competitive salary Guaranteed Incremental.
- Share options.
- 5 days of the company (Monday-Friday). · Health Insurance Benefits.
- Monthly Team Dinner.
- Team gathering and outing at regular intervals.
- Great working and learning environment.
- Generous leave policy.
- Excellent working and learning platform.
- Rewards and Recognition.
